The [New Statesman](#) has published a supplement titled **Heat & light: UK energy and climate policy in context** (hat tip [Energy Bulletin](#)). There is no mention of peak oil but lots of interesting stuff none the less.

The complete pdf of the 32 page supplement is available [here](#).

Whilst talking about the New Statesman it's worth mentioning again their supplement from Oct 2005 titled **Life Beyond Oil** which did specifically cover peak oil. It can be downloaded [here](#).
